

FRAMED immersive projects GmbH & Co. KG is looking for the following to strengthen our team in Berlin:

Junior Assistant Technical Manager (m/f/d)

FRAMED immersive projects GmbH & Co. KG is a Berlin-based studio specializing in innovative sound design, immersive audio technology, and interactive media art. Under the usomo brand, we are developing and installing a headphone-based 3D audio system that dynamically renders sound in real time and reacts precisely to the movements of users in the room.

To strengthen our team, we are looking for a technical assistant with a passion for sound installations and new technologies as soon as possible. You will get involved in the technical implementation of location-based audio installations for museums and sound projects. You will support the planning, implementation and supervision of projects and develop further in an innovative technical environment.

Your tasks:

- Support in the technical planning and implementation of tracking-based interactive audio installations with our specially developed tracking system
- Learning the tools, e.g. software, distance meter to guarantee the accuracy of tracking
- Participation in fault diagnosis and problem solving in the field of tracking and technology
- Preparation of hardware for use – this includes quality inspection, recording of technical requirements, maintenance of material lists and preparation for shipment
- Collaboration with sound designers and programmers to realize installations
- Frequent trips within Europe for installations, test setups and maintenance appointments of media art projects
- Monitoring of inventory, documentation and organization of reorders

What you bring to the table:

- Completed technical training or studies (e.g. electrical engineering, IT, event technology or similar) or a comparable qualification
- Initial practical experience in the technical field (e.g. through internships, part-time jobs or projects)
- Team spirit, hands-on mentality and craftsmanship
- Willingness to familiarize yourself with, operate and further develop new technologies as well as our tracking and hardware tools
- Passion for sound, technology and interactive environments
- Willingness to travel within Europe
- English language skills at C1 level or comparable (working language is English – also in contact with international customers)

Desirable:

- Interest in tracking, IoT or audio technology

- Basic knowledge of network technology (WLAN, IP configuration)
- Initial support experience in technical customer support
- Familiarity with media art and installation works
- Affinity for the museum or cultural sector

What we offer:

- Collaboration on innovative media art projects
- Independent work with direct customer contact
- Development opportunities and personal development
- Travel options within Europe
- A collaborative, interdisciplinary working environment in Berlin

Apply now!

Send us your CV, a short letter of motivation and links to your portfolio or demos to job@usomo.de.

We are also expressly looking forward to receiving applications from career starters or graduates! In this case, please attach as many work samples as possible from your studies or from your own projects.
